

Discover the depth of the Ingersoll tillage line.

Global population is putting extreme pressure on agriculture to keep up with its ever-increasing needs for food and fuel. Major equipment manufacturers are scrambling to develop harder working and longer lasting products. Ingersoll is part of the solution. Our superior steel formulas, along with proprietary design and manufacturing processes make Ingersoll products the right choice for high speed, high yield farming — today and beyond.

For every tillage practice, from conventional to no-till, Ingersoll designs and manufactures disc blades that are unique and ideal for each application. Ingersoll continues to go deeper to discover better ways to manage changing seedbed needs. Whatever tillage or planting challenges you face,

...look to Ingersoll for solutions.
